We Accept Checks

### Sample Railing Job Layout

- Step 1. Determine the style, color and the number of level railing kits you will need (See Catalog Pages 3, 4, 5, and 7)
- Step 2. Determine the style, color and the number of Stair railing kits you will need (See Catalog Pages 3, 4, 5, and 7)
- Step 3. Count the number of 39in post sleeves highlighted in yellow ■ (See Catalog Page 6)
- Step 4. Count the number of 48in post sleeves highlighted in Red ■ and Blue ■ (See Catalog Page 6)
- Step 5. If you are mounting a post to a concrete slab or have an area were you can't get a wood post mounted properly you will need to use a concrete mount or wood mount. We recommend the Blu-Mounts for this application because they are very strong and code compliant. See Page 9
- Step 6. All posts will require base trim; Total up the amount of 39in post sleeves and 48in post sleeves and that's how many base trim you will need. Page 13
- Step 7. Add post caps which should total the same amount of posts you are purchasing Page 12
- Step 8. If you are going to cut sections of railing in half you will need to order an additional set of railing brackets. If you have angled corners you will need to purchase the top T-Rail 45deg bracket kit and the bottom 2x3-1/2" 45deg bracket kits. Noted on page 12 of the catalog.
- Step 9. Don't forget post lights and step lights this is a great way to add that nice finishing touch Page 13
- Step 10. We also offer privacy fencing for your deck project check them out on page 18 to 21
- Step 11. Don't forget deck gates see the bottom right hand corner of pages 3 and 4

Still Have Questions: Send us a copy of you project and we will help you figure the materials list
